ANNUAL REPORT

TO THE

HALTWHISTLE RURAL DISTRICT COUNCIL

For the Year ending
31st December, 1938.

BY

J. M. GLASSE, M.B., Ch. B., (Edin.)

MEDICAL OFFICER OF HEALTH.

To the Chairman and Members of the Haltwhistle Rural District Council.

Ladies and Gentlemen,

I beg to submit my Annual Report for the year 1938. I thank the Sanitary Inspector, Mr. F. J. Lawson, especially, for his assistance in compiling this Report; also Mr. C. E. Wilson, the Registrar, for access to books re Statistics and Mr. T. Dryden, for clerical assistance in the office.

I congratulate the Council for the strenuous work some of them have put in to better things all round, especially Water, Sewerage and Housing Improvements.

The example of the ladies makes one ask why more do not apply for election. Business men say they have not the time to devote to Council work but some of their wives might come forward with advantage to our Council.

The Area of the Haltwhistle Rural District is 96,334 acres.

The estimated Population for 1938 is 8,048.

The number of inhabited houses at the end of 1938 was
2,372.

The sum represented by one penny rate is £147 16s. 4'66d.

The Rateable Value equals £38,496.

SOCIAL CONDITIONS.

The Ventners Hall Colliery Company continue to do well in their fight against the elements. Their pluck is deserving of the best of luck and more support in the road making extensions "out North." We all regret the passing of Mr. Walton Maughan. The welfare of this district was always in his thoughts. He was a visionary but I believe his ideas will eventually materialize.

Messrs. Smith and Walton continue to employ large numbers of our young women and many of our young men. Their Hadrian Paint Products I believe are booming. Mrs. Douglas Smith never loses an opportunity in trying to help Haltwhistle's advancement. This requires some sustained energy and enthusiasm.

The present Council by next March will have completed a term of three years and come up, I hope, for re-election. There has been much soreness and heart-breaking at times over drastic housing demolition but I think the Council on the whole have tried to do their unpleasant work in a just and fair manner.

VITAL STATISTICS.

The Birth Rate is 11.5 as compared with 10.8 per 1,000 for the previous year.

Legitimate	88	Males	46	Females	42
Illegitimate	5	Males	1	Females	4
Still Births	1	Males	—	Females	1

The Death Rate is 13 per 1,000 population compared with 16.3 for the previous year :—

110 Deaths	64 Males	46 Females
------------	----------	------------

TUBERCULOSIS.

Three deaths from Tuberulosis as compared with five the previous year :

Pulmonary Tuberculosis			Non-pulmonary Tuberculosis		
	M.	F.		M	F
Ages	18	20	...	—	10
	1	1		—	1

A Total of Three Deaths.

CANCER.

Fifteen deaths compared with thirteen in the previous year.

Males	6	Females	9	A total of 15 deaths.
-------	---	---------	---	-----------------------

WATER and WATER SCHEMES.

A year is but a day in the sight of the Lord. What it is in the eyes of the Ministry one can only guess.

The Water Scheme has been discussed, mangled and been wangled about, for the last six years and is still not commenced with, although sanctioned by the Ministry. The same old complaints which were placed before the Council some twenty or thirty years ago keep cropping up. So time goes on, old discoveries are re-discovered. True to type, it is the same amiable, dignified, complaisance as in home politics and foreign affairs, which lands us in the mud sooner or later.

At the time of going to press I hear the Spring Water Scheme, at a cost of some fifteen thousand pounds is likely to be commenced this Autumn. This is seven thousand pounds cheaper than the initial cost of the discarded Broomlee Lake Scheme.

I congratulate the present Council in their decision as they have saved the Ratepayers of the Haltwhistle Rural District very many thousands of pounds by opposing the Broomlee Swamp Scheme and they have a clean supply not likely ever to require chlorinating if properly protected.

The people who were responsible for the Broomlee Lake Scheme and the irregular way in which it was initiated can never be forgotten. They almost succeeded in foisting on the District a Swamp Water and everlasting expense, deceiving the Ministry with false and insufficient evidence as to the Spring Water available. In justice to the Ratepayers a surcharge on the late Council would appear to me amply justified.

Various improvements and extensions of water mains, etc., have however been carried out. These include the extension of the Gilsland water main a distance of 800 yards to a point near the village of Greenhead ; the extending of

the Haltwhistle Supply westward, a distance of 175 yards, (3" main), and the laying of a total length of 500 yards of 2" cast iron main on the Council's Housing Estate, Greencroft, Haltwhistle, to supply the houses newly erected.

Two hundred yards of 2" main have also been lifted and relaid following upon road improvements on the north side of of the town.

In order to augment the supply to the village of Melkridge, a reinforced concrete tank of a capacity of 8,500 gallons has been constructed at the spring heads. There was formerly no storage on this system.

Analysis of Water Supplies.

Samples of water for bacteriological analysis have been taken from the following sources :—

Haltwhistle (North Side Supply)	Satisfactory
Melkridge	Satisfactory
Bardon Mill	Satisfactory
Westwood	Satisfactory
Birkshaw	Not satisfactory
Gilsland	Satisfactory
Haltwhistle (Main Supply, South Side)				Satisfactory

SCAVENGING and PUBLIC CLEANSING.

This is carried out by contract in the town and is under the supervision of the Sanitary Inspector. Bins continue to be substituted for Ashpits. Difficulty in the removal of refuse is often experienced in the small hamlets, and with a view to eliminating this source of nuisance the Council is contemplating the purchase of a modern refuse collecting vehicle of a type suitable to the requirements of a Rural Area, and generally remodelling the existing scavenging arrangements.

Additional tipping ground has been provided at the Town Foot, Haltwhistle by the laying of 100 yds. 12" Sewer through a section of the Tip. This gives an approximate additional tipping area of 1,500 square yds. (4,500 cub. yds.)

SLAUGHTER HOUSES.

There are Six Slaughter Houses in the District, all privately owned.

SMOKE NUISANCE.

This being principally an agricultural district there is no nuisance from this source.

HOUSING.

Number of Inhabited Houses at end of 1938	2,372
Number of New Houses built in 1938	... 88

Inspection and reconditioning work under the Housing Acts has proceeded satisfactorily during the year. Clearance Orders have been confirmed against 26 houses following upon a Housing Inquiry held by an Inspector of the Ministry.

A further total of 26 houses have been secured for individual demolition.

This year has also seen the erection and completion of 83 houses built on the Council's Housing Estate, Greencroft, Haltwhistle, for the occupation of displaced tenants.

DRAINAGE and SEWERAGE.

Haltwhistle :

The sewerage works recently constructed to meet the needs of Haltwhistle are, after some alteration to the gauge plant and overflow sill, now working as satisfactorily as can be expected, but are overloaded, too large a volume of surface water from various sources (stone drains, etc.) finding access to the sewers. Steps have been taken to relieve this, and further action is contemplated.

The necessary plans, etc., have been prepared for treatment of the disposal of sewage from Thorngrafton, Westwood, Bardon Mill, Redburn, Tow House and Melkridge, pending the settlement of the proposed water scheme, and also for Greenhead, Longbyre and Slaggyford.

Joint Action is also proposed to be taken between the Haltwhistle and Brampton Councils with a view to enlarging the existing sewage works at Gilsland, which is in the Haltwhistle Area, in order to make provision for that part of Gilsland which is in the Brampton Area, and which has no system of sewage disposal.

A large amount of drainage work has been carried out during the past year, more especially in connection with the erection of 82 houses on Greencroft Housing Estate, and a total of 183 yards of drainage having been inspected and tested in connection with the above.

CLOSET ACCOMMODATION.

Conversion to Water Closets	—
Additional Water Closets	94
New Houses—Water Closets	88
New Houses—Privies	—
Additional Earth Closets	2

HOUSING STATISTICS.

Housing (Consolidated) Regulations, 1925.

Houses erected during the year—

(a)	By Local Authority	83
(b)	By other Bodies or Persons	5

I.—Inspection of Dwelling Houses during the year :

(1)	(a)	Total number of dwelling houses inspected for housing defects (under Public Health or Housing Acts)...	423
	(b)	Number of Inspections made for the purpose	695
(2)	(a)	Number of dwelling houses (included under sub-head (1) above) which were inspected and recorded under the Housing Consolidated Regulations, 1925	—
	(b)	Number of Inspections made for that purpose	—
(3)		Number of dwelling houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation	29
(4)		Number of dwelling houses (exclusive of those referred to under the preceding subhead) found not to be in all respects reasonably fit for human habitation	370

2.—Remedy of Defects without Service of Formal Notices :

	Number of defective dwelling houses rendered fit in consequence of informal action by Local Authority or its Officers	93
--	---	-----	-----	----

3.—Action under Statutory Powers :

(A)—Proceedings under Sections 9, 10 and 16 of the
Housing Act, 1936.

(1)	Number of dwelling houses in respect of which “notices” were served requiring repairs	21
-----	---	-----	-----	----

(2)	Number of dwelling houses which were rendered fit after service of formal notices :—	
(a)	By Owners	21
(b)	By Local Authority in default of Owners	—
(B)—Proceedings under Public Health Acts :—		
(1)	Number of dwelling houses in respect of which notices were served requiring defects to be remedied	—
(2)	Number of dwelling houses in which defects were remedied after service of formal notices :—	
(a)	By Owners	—
(b)	By Local Authority in default of Owners	—
(C)—Proceedings under Sections 11 and 13 of the Housing Act, 1936 :—		
(1)	Number of dwelling houses in respect of which Demolition Orders were made ...	28
(2)	Number of dwelling houses demolished in pursuance of Demolition Orders ...	1
(D)—Proceedings under Section 12 of the Housing Act, 1936 :—		
(1)	Number of separate tenements or underground rooms in respect of which Closing Orders were made	3
(2)	Number of separate tenements or underground rooms in respect of which Closing Orders were determined, the tenement or room having been rendered fit	2
4.	Number of Houses permanently discontinued as Dwellings and not included above ...	34

SANITARY INSPECTIONS OF THE AREA.
